

BSFA30

Regulator Flashback Arrestor Set

Features

- Built in check valve prevents the reverse flow of gas.
- High Flow Capacity.
- Requires a minimum pressure of 2 PSI for gas to flow.
- Designed for "B" torch and hose fittings.
- Used to stop the flame or reverse the flow of gas back up into the equipment or supply line, protecting both the user and equipment from any damage or explosions.
- Pressure Rating for oxygen: 125 psi
- Pressure Rating for acetylene: 15 psi
- Pressure Rating for other fuel gases: 22 psi

Applications

- Cutting and Welding

Technical Specifications

- **Size:** Fits all 9/16" – 18" regulators and torches
- **Weight:** 0.5 lbs
- **Packaging:** Packaged individually
- **Country of origin:** US

Usage Instructions

- Be sure to leak test the system before pressurizing.
- Always bleed the system before disconnecting.
