

MOLDEx[®]

DISPOSABLE & REUSABLE HEARING PROTECTION

Decibel Scale (dBA)			
160		NRR (NOISE REDUCTION RATING)	
150			The NRR is a system for measuring the reduction in noise level provided by hearing protection. The higher the NRR, the greater the possibility of noise reduction for the user wearing the protection. When choosing a hearing protection product, consider the NRR to ensure the product is providing the right amount of protection for your workers.
140			All Moldex hearing protection devices are independently tested to ANSI S3.19-1974 by Michael & Associates, Inc., State College, PA. With Moldex disposable and reusable hearing protection, your crew is getting the protection they need to get the job done safely and comfortably.
130			Our most popular hearing protection products include:
