## **SPECIFICATION SHEET**

# **TECHNIWELDUSA**

# **CC402**

#### 2" C-Clamp

Features	<b>Technical Specifications</b>
<ul> <li>Heavy Duty Casted C-Clamp</li> <li>Anti slip protection features</li> <li>Copper plated spindle for spark protection</li> </ul>	<ul> <li>Material: Drop forged, powder-coated steel</li> <li>Throat Depth: 2.25"</li> <li>Jaw Opening: 0-2"</li> <li>Spindle Diameter: 9/16"</li> <li>Clamping Force: 3500 lbs</li> <li>Clamping Torque Capacity: 3500 lbs</li> <li>Weight: 2.91 lbs</li> <li>Packaging: 20 per box</li> <li>Country of origin: India</li> </ul>

### **Applications**

- Welding
- Construction
- Automotive
- Manufacturing

#### **Usage Instructions**

- Place the pieces you want to hold together in the desired alignment.
- Select a c-clamp that fits the size of your workpieces and has the appropriate throat depth
- Position the c-clamp around the joint area, ensuring the clamp pads make contact with both workpieces.
- Turn the clamp's screw clockwise to secure the workpieces together. Apply enough pressure for a firm hold but avoid excessive force.
- When done, turn the clamp's screw counterclockwise to release the pressure.
